Subject: York County Conditional Use Permit issue to Yorktown Power Station

We have been informed by the Yorktown Power Station of their proposal to amend the York County Conditional Use Permit (CUP) in order to allow coal ash to be removed by alternate routes from the current structural fill storage facility at Wolf Trap Road for the purpose of beneficial reuse. The proposed alternate routes are by way of Newsome Drive or by Hornsbyville Road.

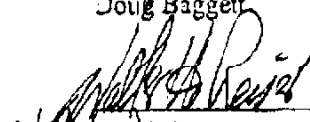

We have no objection to this proposal as long as *only* those portions of the CUP dealing with the ash fill site and ash beneficial reuse are amended. It is our understanding that protection for control of fugitive dust and traffic are included in the CUP and will not be changed in the proposed amendment. It also is our understanding that changes are only proposed to condition A33 of the CUP.

We require, and Yorktown Power Station has agreed, that the CUP as well as the Revised Consent Decree will remain in force. We also specify that at this time, no changes related to the potential use of petroleum coke as an alternate fuel be made to the CUP.
